Comments/other:	

Watering During the Day / Raining

Conservation Tip:

Adjust your irrigation timer to water either before 7 am or after 8 pm. Irrigating during the day can result in water loss due to evaporation or heavy winds.

City Ordinance 12.06.100(A) states "Watering of landscape or other turf area shall not be allowed between 10 am and 4 pm."

Comments:

Excessive Water Runoff

Conservation Tip:

The soil in Fullerton is primarily composed of clay and tends to stop absorbing water after a few minutes of irrigation. Cycles lasting beyond 5 minutes tend to create significant runoff that ends up in the gutter.

City Ordinance 12.06.090 states at all times "No water runoff from landscaped areas into adjoining streets, sidewalks, or other paved areas due to incorrectly directed or incorrectly maintained sprinklers or excessive watering shall be allowed."

Comments:

Hosing Down Driveway / Walkways

Conservation Tip:

Use a broom. Cleaning sidewalks and driveways with a hose wastes water and washes pollutants into storm drains and eventually into the ocean.

City Ordinance 12.06.100(A) states "There shall be no hose washing of sidewalks, walkways, driveways, parking areas, or other paved surfaces..."

Comments:

Broken / Misaligned Sprinklers

Conservation Tip:

Irrigation systems should be routinely tested to identify any leaks, broken sprinkler heads, or sprinklers watering into the street or other hardscaped areas.

City Ordinance 12.06.100(A) states "All leaks from indoor and outdoor plumbing fixtures shall be promptly repaired."
