Comments/Other: _____

No Effort is Too Small...

Watering During the Day/Incorrect Day of Week

Watering of landscape or other turf areas during prohibited hours or days. (Section 12.06.100 & modified per resolution)

No watering on Mondays, Wednesdays and Fridays. Addresses that end in 0,2,4,6,8 can water on Tuesday, Thursday and Saturday. Addresses that end in 1,3,5,7,9 can water on Tuesday, Thursday and Sunday.

Prohibit watering on all days between the hours of 8a.m. and 6p.m.

Excessive Water Runoff

Water runoff from landscaped areas into adjoining streets, sidewalks or other paved areas due to incorrectly directed or incorrectly maintained sprinklers or excessive watering. (Section 12.06.090)

The soil in Fullerton is primarily composed of clay and tends to stop absorbing water after a few minutes of irrigation. Cycles lasting beyond 5 minutes tend to create significant runoff that ends up in the gutter.

Hosing Down Driveway/Walkway

Hose washing of sidewalks, walkways, driveways, parking areas or other paved areas. (Section 12.06.100(A))

Use a broom. Cleaning sidewalks and driveways with a hose wastes water and washes pollutants into storm drains and eventually into the ocean.

Broken/Misaligned Sprinklers

Unrepaired leaks from indoor or outdoor plumbing fixtures (Section 12.06.100(A))

Irrigation systems should be routinely tested to identify any leaks, broken sprinkler heads, or sprinklers watering into the street or other hardscaped areas.
